In the tradition of Ignatius of Loyola, the Institute supports each person to find their own way to mature into a personality.

For this reason, the Center for Ignatian Pedagogy has developed a concept of continuing education for the German-speaking area, which offers education specialists guidance in their valuable work.

We offer educators from all schools and SJ employees a space to get involved, exchange ideas and thus work on the future of the Ignatian profile.

Main offers are:

Pedagogy

Political education

Prevention against violence

Digital learning

Educational programs for parents and tutors.
